

How to Make Strong (0.5%) Chlorine Solution

Chlorine solutions of 0.5% should be used for DISINFECTING OBJECTS (floors, counters, bedrails, medical equipment).

Make chlorine solution every day. If chlorine solution is more than 1 day old, throw it away.

**1.5 liter
water bottle**

**A little less than
1 TABLESPOON**

**STIR WITH
A STICK FOR
10 SECONDS**

Label the container: **“STRONG (0.5%) CHLORINE SOLUTION”**

WAIT 30 MINUTES BEFORE USE

WARNING: Chlorine can burn. Always wear gloves and goggles when handling chlorine granules and strong solutions!
