EBOLA MUST GO

Stopping Ebola is Everybody's Business

Bury all dead bodies safely

- Allow only trained people to handle a dead body
- Do not touch, bathe or bury a dead person. Do not hide dead people
- Families can still pray and make decisions about the funeral – the only rule is never touch a dead body

Keep sick people away from others

- Do not touch sick people or things they have used
- Keep them in their own area and stay 4 steps away
- Get the person treatment quick – call **4455 and tell your community leader**

Speak out if you know of a sick person

- Always call **4455 and tell your community leader**
- Do not hide sick people
- Do not let others hide sick people

Help find everyone who touches a sick person

- Anyone who touched a sick person is a “Contact” who could have Ebola
- Help health workers find these “Contacts”
- If you touch a sick person, stay home and tell your community leader

“Contacts” must stay to one area with food and water

- Anyone who touches a sick person must stay to their area for 21 days
- Make sure these “Contacts” do not run away
- Give them food and water and encourage them – talk to your community leader

Protect yourself. Protect your family. Protect your community.
